

Graph each equation.

Name: _____ Period: _____

1. $-3x + y = -9$

2. $-6x - 3y = -21$

3. $-5x + 3y = -12$

4. $3x + 6y = 36$

5. $-3x + 2y = 16$

6. $4x + 4y = -40$

Graph each quadratic function by finding the vertex then using a table of values.

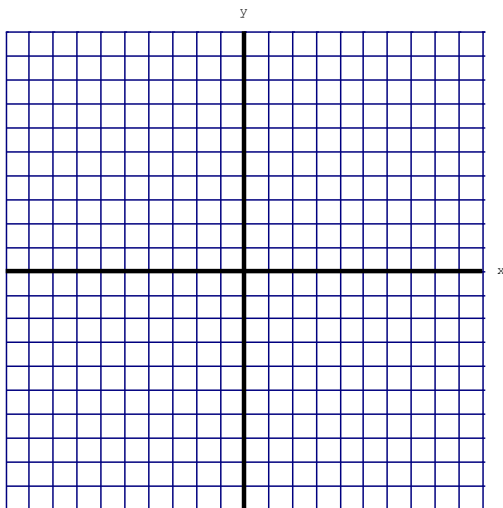

1. $y = x^2 - 6x + 5$

2. $y = x^2 + 4x - 5$

3. $y = -2x^2 + 4x + 6$

4. $y = -x^2 - 7x - 10$
