

Solve the system of equations using all 3 methods.

$$3x + 2y = 4$$

$$-2x + y = -5$$

$$(2, -1)$$

**1. Graph**

$$3x + 2y = 4$$

$$-2x + y = -5$$

**2. Substitution**

$$3x + 2y = 4$$

$$-2x + y = -5$$

**3. Elimination**

$$3x + 2y = 4$$

$$-2x + y = -5$$

Solve the system of equations using all 3 methods.

$$5x - 2y = -4$$

$$x + 2y = -8$$

**1. Graph**

$$5x - 2y = -4$$

$$x + 2y = -8$$

$(-2, -3)$

**2. Substitution**

$$5x - 2y = -4$$

$$x + 2y = -8$$

**3. Elimination**

$$5x - 2y = -4$$

$$x + 2y = -8$$
