

Solve the system of equations using all 3 methods.

$$\begin{aligned}3x + 2y &= 4 \\ -2x + y &= -5\end{aligned}$$

1. Graph

$$\begin{aligned}3x + 2y &= 4 \\ -2x + y &= -5\end{aligned}$$

2. Substitution

$$\begin{aligned}3x + 2y &= 4 \\ -2x + y &= -5\end{aligned}$$

3. Elimination

$$\begin{aligned}3x + 2y &= 4 \\ -2x + y &= -5\end{aligned}$$

Solve the system of equations using all 3 methods.

$$5x - 2y = -4$$
$$x + 2y = -8$$

1. Graph

$$5x - 2y = -4$$

$$x + 2y = -8$$

2. Substitution

$$5x - 2y = -4$$

$$x + 2y = -8$$

3. Elimination

$$5x - 2y = -4$$

$$x + 2y = -8$$
